CTE Patch for BCM 3.0.1

Patch Description:

The purpose of this patch is it provides new TAPI functionality for support of Bridged Shared Lines, set Synchronization and Set re-synchronization. The patch is intended for a BCM 3.0.1 system only.

This patch updates the CTE Server on the BCM and provides a new LAN CTE Client download. After applying the patch, all PC's should uninstall the older LAN CTE Client before installing the updated LAN CTE Client.

Software Components Changed:

- CTE.exe

BCM Release and Affected Profiles:

- BCM 3.0.1
