BCM 3.6 IPView SoftBoard v.2.0.008

The following issues are addressed:

- **BCM 3.6 IPView SoftBoard v.2.0.007**
  - Q01088786: RCC 2.1.047 / QT parameter fouled x thousand to x thousand one hundred.
- **BCM 3.6 IPView SoftBoard v.2.0.007**
  - [Q00880351-01](): IPview:Need the ability to choose what network card it uses - sw fix.
    - In the Echoing tab the user can now choose the IP Address to use a drop down menu. Help About dialog box shows the IP Address that ipView is listening on. (Before it used to show the first one it found.)

Status:

- Generally Available -
