

BCM050.055-VOICEMAIL--- VERSION:1.0--- RELEASE:1.0

Applicable Platform: BCM50 R1

Recommendation: Non-critical - Enhancement for Simultaneous ringing and continuous announcement at the attendant set. In addition, this patch introduces a new feature found in other Call Pilot products called "Service Directory Numbers" SDN's can be used to assign a variety of services, such as express messaging, name dialing, auto attendant and greeting tables, to a Directory Number. When a caller dials this DN, they connect to the various services that can be setup in the Service DN Table. Documentation for this new feature can be found through www.Nortel.com/Support. On the support page, a search for the title "Call Pilot Setup and Operation Guide" will find the correct document. A new chapter, Chapter 11, has been added to provide feature details.

Component & Version: voicemail-10.00.93.22
