CallPilot
Command Comparison Card

Welcome to CallPilot. This card helps you to learn CallPilot by showing you the key differences between CallPilot and your previous messaging system. For example, in CallPilot, you don't need a main menu. When you log in, you are at your first new message right away. To play your messages, compose new messages, or change mailbox settings, you use standard commands that are common to all features. Prompts guide you whenever you pause, and Help is always there when you need it – just press *. For further information, refer to the CallPilot Multimedia Messaging User Guide.

Features	CallPilot	Previous system
